DOUGLAS ROBINSON

CYBERSECURITY MANAGEMENT & POLICY | U.S. ARMY VETERAN | GRC / RMF / NIST

Baltimore, Maryland | djdouge.github.io/CodeCraftHub | github.com/djdouge

PROFESSIONAL SUMMARY

U.S. Army veteran transitioning into cybersecurity while pursuing a B.S. in Cybersecurity Management & Policy at the University of Maryland Global Campus. Background combines security-focused operations, leadership, procedural compliance, client management, technical troubleshooting, and hands-on portfolio work in GRC, RMF, NIST controls, risk analysis, networking, and local AI systems.

CYBERSECURITY CAPABILITIES

Governance, Risk & Compliance • NIST CSF 2.0 • NIST RMF • NIST SP 800-53 • Risk registers • Security-control assessment • Remediation tracking • Information assurance concepts • Networking fundamentals • Windows • PowerShell fundamentals • Access control • Technical documentation • Executive risk communication

CYBERSECURITY PORTFOLIO

GRC / RMF Portfolio Case Studies

Built public simulated artifacts: risk register and treatment plan, NIST SP 800-53 control assessment, RMF lifecycle case study, and executive cyber risk brief.

N.E.M.O. — Neural Execution & Mission Orchestrator

Active private offline-first desktop AI project involving local model integration, permission gates, privacy boundaries, execution-state handling, failure recovery, acceptance/regression testing, and Windows troubleshooting.

Macro Tracker Plus

Personal software project involving application development, privacy documentation, testing, and technical problem-solving.

EXPERIENCE

United States Army | 1997–2014 | E-5

Combat Engineer • Heavy Equipment Operations • Security Operations. Controlled-area procedures, patrol and access-control responsibilities, protection of personnel and equipment, F-22 flight-line security support, risk awareness, accountability, training, team leadership, and mission-focused procedural compliance.

Independent Fitness & Performance Consultant | ~20 years

Client assessment, risk awareness, program planning, documentation, technical communication, long-term client management, scheduling, coaching, and performance measurement.

EDUCATION & PROFESSIONAL DEVELOPMENT

University of Maryland Global Campus — B.S. Cybersecurity Management & Policy, in progress
CompTIA Network+ (N10-009) — current study
Google cybersecurity coursework • IBM generative AI coursework • American InterContinental University business administration coursework, 66 credits completed

TARGET ROLES

Junior Cybersecurity Analyst • GRC Analyst • RMF / ISSO Support • Information Assurance • Security Control Assessment Support • Cybersecurity Risk / Compliance • Internship / Apprenticeship • Government / Defense Cybersecurity Support

Public résumé: personal phone and email intentionally omitted. Recruiter-specific version available with direct contact information.
